(54) CYLINDER CARTRIDGE FOR CYLINDER CARRIER

(57)Abstract:

PROBLEM TO BE SOLVED: To load a small-sized cylinder in a cylinder carrier, by constituting the small-sized cylinder circularly-movable by a conveyer.

SOLUTION: A cylinder cartridge 21 capable of being loaded on a cylinder carrier is provided in a belt shape astride a peripheral direction region of the fixed side support member and a movable side support member, together with a circular cylinder base 22 loading a small-sized cylinder C in a condition of layering a plurality of cylinders in a vertical direction, a fixed side support member 24 supporting one side in a peripheral part of each small-sized cylinder on the cylinder base, upper/lower movable side support members 25, removably provided in the fixed side support member to

be mounted/demounted between a support position supporting each small-sized cylinder and a removal position capable of loading/unloading the small-sized cylinder. A protector member 27 is provided which brings a peripheral surface into slide contact with a guide member guiding the cylinder by slide contact with a barrel part peripheral surface of the cylinder when it is circularly moved by a conveyer on a load-carrying platform bottom surface of the cylinder carrier.
